

Safe, simple technology for the people who care

IT, cyber security and safe AI for NDIS providers and childcare centres. We protect the information you hold about participants, children and families, help your team use AI safely, and find the software you can stop paying for.

Fixed prices, published

Mapped to your standards

Onshore and offshore engineers

No lock-in contracts

The five folds we look after

People

Leavers switched off on day one, multi-factor login, no shared logins.

AI

A clear AI use policy, safe tools, and no case notes or children's details in public chatbots.

Spend

Every subscription checked against real use. Savings go back into care.

Security

Encrypted, wipeable devices, protected email, and the Essential Eight basics.

Data

Tested backups, locked-down sharing, a breach plan and audit-ready incident records.

For NDIS providers

- Evidence for the Practice Standards: Information, Risk and Incident Management
- Shared house devices and support workers' phones secured
- Ready for the 90-day claiming window and longer record keeping
- We review the systems you already use, such as ShiftCare, Brevity, Lumary, Microsoft 365 or Google

For childcare centres

- Service-issued devices only for photos of children (in force since 27 February 2026)
- A digital technologies policy that matches what really happens in rooms
- Evidence for Quality Areas 2 and 7 and the Child Safe Standards
- We review the systems you already use, such as Xplor, Storypark, OWNA or Microsoft 365

Coming up for both sectors: from 10 December 2026, privacy policies must explain any automated decisions that use personal information, including AI. We can help you get ready.

How to start

Tech Health Check

~~\$1,950~~ **\$1,490** one-off, ex GST

A 5-day remote review of all five folds, a red-amber-green report mapped to your standards, a savings list and a 30-day fix plan. **Free if we find neither \$1,490 a year in savings nor a material gap.**

Fix & Harden

From \$2,500 one-off, ex GST

We close the gaps in your report on a fixed quote. Your Health Check fee is credited if you go ahead within 60 days.

Managed IT & Care

From \$1,500 /month, ex GST

Helpdesk, devices, security monitoring, monthly restore tests and a quarterly AI and spend review. Month to month.

Day 1. 45-minute kickoff; you give read-only access.

Days 2–3. We review. Nothing changes in your systems.

Day 4. Your report arrives.

Day 5. We walk you through it and agree the fixes.
